

COVID-19 Policies and Procedures

March 30, 2020

Dear Valued Customers:

Based on our product mix and customer base, Applied Porous Technologies is considered an essential business under the State of Connecticut guidelines for containment and reduction of the spread of the novel coronavirus. During this time, we are taking every precaution to ensure the safety of our employees and customers. We have revised our manufacturing schedules and our procedures to minimize personal contact. We have instituted strict cleaning procedures for all equipment and contact points, and our plant is closed to all outside visitors and unscheduled deliveries. Employees who can fulfill their tasks by working from home have that option.

We have also been working closely with our vendors to ensure the uninterrupted supply of raw materials while maintaining the highest safety standards. APT will continue to do everything possible to supply you with essential porous metal components, on time, while enacting measures to maintain the health and safety of our staff.

All of us at Applied Porous Technologies hope that you and families are safe and healthy as we work together through this crisis. If you have any questions or concerns, please contact us.

Sincerely,

The Applied Porous Technologies Team
